I am interested in the following courses
in Equine Medicine:

- Cardiology
- Dentistry
- Dermatology
- Diagnostic Imaging
- Emergency Care
- Orthopaedics
- Reproduction
- Rehabilitation and Physiotherapy
- Surgery
- Others

About ESAVS

The European School for Advanced Veterinary Studies (ESAVS) at the faculty of Science, Technology and Communication of the University of Luxembourg provides high quality study programs for the veterinary profession.

Since 1992, the European School for Advanced Veterinary Studies (ESAVS) has been providing training courses for veterinarians from all over the world wishing to upgrade their knowledge in many areas of veterinary medicine.

This very successful program has now run a total of 174 courses in more than 20 disciplines, with over 4,000 postgraduate students from 48 countries, and is recognised worldwide for the high quality of its education. Although these courses have not involved formal examinations, many of the students completing them have gone on to acquire specialist qualifications at the highest level.

The ESAVS has recognized the need for a broader training that would allow veterinary graduates in practice to study over a number of years and acquire a recognized postgraduate qualification. Two years ago, the ESAVS formalised a longterm association with the University of Luxembourg and became integrated into its Faculty of Science and Communication. This union has enabled the establishment of a certificate, which can meet this need.

Our Strengths

■ Experience

The ESAVS has a proven experience in conducting outstanding postgraduate programs for veterinarians from all over the world and is one of the leading international veterinary schools for postgraduate studies.

■ Innovation

As veterinarians are continuously challenged to upgrade their level of competence in specialised disciplines, the ESAVS meets the challenge to satisfy the requirements of its participants.

■ Facilities

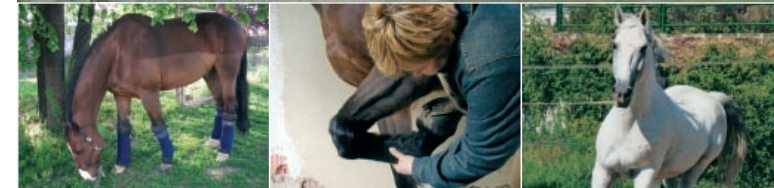

The use of University facilities and cooperation with leading companies within the industry, ensure a high standard of specialised equipment and a studious training environment.

If you would like to receive our free annual brochure or wish to know more about the ESAVS courses please visit our website www.esavs.org, complete the attached form and send by fax to +49-6782 43 14 or e-mail us at info@esavs.org.

Advanced Veterinary Studies
University of Luxembourg

2009
Courses for
Equine Practitioners

Equine: Dentistry

Hannover/Germany, 31 August – 4 September 2009

Course Master in charge: Dr. Peter Fahrenkrug (Dip. EVDC)

Co-lectures: Dr. Peter Stelzer, Prof. Dr. Horst Keller

General Information:

During the five days of this equine course veterinarians will be taught to diagnose and treat dental problems in horses.

Starting with an update in equine oral anatomy, participants will receive information regarding: developmental, traumatic and age-related malocclusions and defects including equine oral X-ray techniques and common pathological findings. A majority of the full range of instruments will be available for hands-on use. Standard techniques including: sedation, nerve blocks and examination procedures will be extensively practised on wet specimens in the pathology department, followed by a full day of practical hands-on treatment on numerous live horses at the famous Hannoverian National Stud Farm.

The participants will be split into groups. Each group will make a diagnosis and treatment plan for a single horse. Afterwards they will check their results with the lecturers and if correct, conduct the treatment or they will have to re-access their findings and diagnosed treatment prior to treating the animal. Participants are encouraged to bring their own instruments and will be trained to optimize the use of them and recognize any defects.

Topics:

- Anatomy and physiology of equine oral structures
- X-ray techniques, sedation, nerve blocks
- Sinus problems, empyema, fenestration, trephination
- Treatment of horses of different breeds and ages
- Diagnosis and documentation of findings
- Routine and advanced floating procedures of incisors and molars
- Correction of malocclusions
- Extraction of Milk Teeth, Wolf Teeth & Stallion Teeth
- Various treatment methods depending on respective results/findings
- Debriefing session

Tuition fee: EURO 1.690,-

Early registration: EURO 1.590,-

(deadline for early registration: 31st March 2009)

Equine: Advanced Rehabilitation and Physiotherapy

Neustadt (Dosse) / Germany, 10 – 14 August 2009

Course Master in charge: Dr. Sabine Mai (FTA f. Physio. & Reha.)

Co-lectures: Dr. Robert Stodulka, Dr. Karen Baker-Bensfield

Monday, 10 August 2009

08:30 – 09:15 Welcome & Organisation
09:15 – 10:00 Functional Anatomy and Biomechanics
10:30 – 12:00 The Horse in Motion, Horse and Rider
14:00 – 14:45 Bony Landmarks
14:45 – 16:45 Muscles, Muscle Physiology
16:45 – 17:45 The Well Balanced Horse / Discussions

Tuesday, 11 August 2009

08:30 – 10:00 Soft Tissue and Bones
10:30 – 12:00 Cartilage and Ligaments
14:00 – 15:30 Tendons and Nerves
16:00 – 16:45 Hoof
16:45 – 17:45 Shoeing or not? Discussions

Wednesday, 12 August 2009

08:30 – 10:00 The Horse's Back and Saddle Fitting
10:30 – 12:00 Bridles and Bits / Therapeutic Exercise (Neck)
